EXPERIENCE

Pay As You Go Carpets (Happy Customers Ltd.)

United Kingdom · Remote

Senior Full Stack Developer

Feb 2024 - Present

- Served as a Senior Fullstack Developer, maintaining and enhancing a critical in-house CRM system central to lead management, appointment scheduling, order fulfillment, payment processing, inventory, and automated background jobs for a UK-leading furniture company.
- Spearheaded the development and implementation of a comprehensive customer portal, enabling customers to track orders, appointments, and payments independently, significantly reducing direct contact requests.
- Implemented an AI Agent system using Google ADK, enhancing employee efficiency, drastically decreasing workflow inaccuracies, and directly contributing to increased customer retention and satisfaction.

Verde Inc.

Istanbul, Türkiye · Hybrid

Senior Lead Developer / Team Lead / CTO

Feb 2022 - Feb 2024

- Progressed from Senior Fullstack Developer to Team Lead and CTO, leading a team of 10 developers in building a modular monolith e-commerce retail arbitrage platform from the ground up, implementing domain-driven design.
- Engineered a highly distributed Python scraping system that processed over 100 million product listings daily from major e-commerce platforms (Trendyol, Hepsiburada, N11), reducing manual product research time by 95%.
- Established complete cloud infrastructure on bare metal servers using Terraform and Ansible, deployed a scalable Kubernetes cluster, optimized enterprise databases (Couchbase, Neo4j), and implemented high-throughput ETL pipelines with RabbitMQ and Python.
- Directed the development of the core web application using Laravel with React, and implemented robust CI/CD pipelines leveraging Github Actions and ArgoCD, establishing Agile processes for the team.
